

Inferno Intenso is a next-generation alarm siren, designed to deliver powerful protection where it matters most.

In addition to functioning as a traditional siren, Inferno Intenso creates an effective sound barrier that confronts the intruder directly at the door. The unbearable sound helps stop the intrusion at a very early stage and makes it difficult to continue the attack. With coverage of up to 70 square meters per unit, Inferno Intenso is suitable for everything from individual doors to larger protected areas. For more extensive installations, multiple units can be interconnected and operate together to cover significantly larger areas with the same high sound level and clear effect.

Inferno Intenso is developed for professional security installations where reliability, performance, and easy scalability are essential. The result is an alarm siren that does more than alert, it actively contributes to preventing intrusions and strengthening the overall perimeter protection.

-  **Unbearable sound**
-  **Compatible with all makes and types of alarm systems**
-  **Award-winning design, easily integrated into public spaces and private homes**
-  **Sabotage protected with battery backup**

Technical specifications

Protective volume	Directional or to protect a volume up to 150 m ³
Dimensions	L = 685 mm / 26,97 in W = 106 mm / 4,17 in D = 40 mm / 1,58 in
Weight	1,7 kg / 3,7 lb
Frequency range	2-5 kHz
Acoustic effect	125 ±3 dB(A) @ 1 m / 3,28 ft
Battery backup	9.6 V, 1600 mAh, Ni-MH
Battery lifetime	Up to 3 years
Power consumption	12 - 16 V DC, < 150 mA
Function time at cont. signal	> 30 minutes
Standby without charge	Up to 1 month
Temperaturer ange	-10 – +60(C), 14-140 (F)

The presence of an active Inferno Intenso complicates criminal activity during the critical time between alarm activation and the arrival of a security company or the police. Its purpose is to protect the site during this period. The patented sound spectrum is extremely difficult to locate, making it hard for intruders to eliminate the source of discomfort. The sound is harmless and does not cause permanent hearing damage according to scientific studies.

Inferno Intenso is easy to install and suitable for small offices, retail environments, warehouses, and residential properties. It enhances existing security systems and features built-in tamper protection, battery backup, and a robust aluminium and steel housing.
